

KEEL AGRI

Calf Creep Feeder

KEEL AGRI

We've been manufacturing our calf creep feeders since 1995. They are designed for maximum weight gain by allowing ease of entry and exit to the trough, providing ad-lib feeding. Our open back pin stops calves using the feeder as a shelter during periods of bad weather the height and width of the entrance dividing bars are fully adjustable. A canvas flap prevents birds entering the trough.

Features

- Robust box section steel frame
- Folded sheet steel construction
- High quality painted finish over anti rust primer
- 500kg feed hopper with rain proof lid
- Open back pin reduces calves using feeder as a shelter
- Back pin height and width bars adjustable
- Back pin can be quickly and easily unassembled for road transport
- Made with lifting bar for quick pick up attachment with three point linkage

KEEL AGRI

Open back pin reduces calves using feeder as a shelter.

Back pin height bars can be quickly and easily adjusted. .

Back pin width bars can be quickly and easily adjusted. .

A canvas flap drapes down covering the trough and prevents birds entering.

Folded sheet steel trough ensures strength and reduces the likelihood of water ingress.

500kg feed hopper provides ease of refilling, the raised lip construction of the lid ensures water cannot get into the feed hopper.

The quick assembly and disassembly of the feeder means that transporting the feeder is no longer a problem and can easily be moved with a pickup or trailer or on the tree point linkage without worrying about a large tail swing.

All our products are ex-stock and can be delivered
